

Missing PERMEABL Data

This document reports the missing data records in the ancillary PERMEABL file. Missing data are reported by transect, station (distance in feet from the northwestern end of the transect), and nominal piezometer depth. Conductivity readings are missing for the following stations and depths (lithology classifications are available for all stations and depths):

Transect B

No missing data

Transect C

No missing data

Transect D

D326 @ 2ft

D474 @ 2ft

D679 @ 2ft

D794 @ 12ft
